Mr. Combs Will Contest Mr. Harris' Elec-

Last Satuday, being the last day upon hich Legislative contests could be rom various portions of Kentucky by oth Republicans and Democrats who were defeated for the Legislature in he recent election on the face of the

Among these was the contest filed by e attorneys of Hou. W. W. Combs, of Waco, against his successful Republican opponent, Hon. W. T. Harris, of this city. We understand that among ther grounds of contest, Mr. Combs alwollow and Biggerstaff precincts. The exact allegations which Mr. Combs oposes to prove, we are not able ac arately to give, not having seen his apers before they were filed on Saturay. We understand, however, that ne will ask that Bearwallow precint be thrown out because the election was not held by secret ballot, but that voting was done openly in disregard of the election law. At Duncannon seven vere thrown out, two of which were Republicans, because a pencil was sed instead of the regulation stencil. This and other alleged "distinguishing marks" caused the officers to threw out those ballots, the Democrats losing five votes thereby. The trouble in Biggerstaff was that the ballots gave out and nineteen Democrats and six Republicans did not vote at all. If the Legislature considers these valid grounds for—unseating Mr. Harris, his majority of 54 will be over come by a onsiderable margin, as Barwallow gave a Republican majority of 50, and the five Democratic ballots thrown out at Duncannon, and the 19 not voting at iggerstaff, will more than offset the Republican majority.

The contest is generally a surprise as it was supposed that the decision of the ounty Commissioners left no room for doubting that the result as then an-

nounced would be acquiesced in and final. But the Legislature, like Congress, is the judge of the qualifications and election of it own members, and there will be warm times at Frankfort when that august body assembles next The CLIMAX does not attempt to pass upon the merits of the question

Double Heater with Tea Kettle Attachment. \*\*\*\*\*\*\*\*

SMOKE CONSUMING PARLOR FURNACE Air passes through registers in heavily guarded feed door into perforated mixer ring around top of heavy fire pot, then into fire. Mixing the air with gases, in this way produces perfect combustion and a great saving of fuel. Mixer ring also protects bottom of radiator from direct action of fire and insures its durability.

POWERFUL FLOOR HEATER Deflector ring between heavy ribbed fire pet and radiator extends to outer casing, forcing the intense heat from lower section of Stove down to the floor where most required. WILL HEAT ROOM UP-STAIRS By attaching pipe to Double Heater Collar and extending to register in floor above. If not used in that way, heat is distributed to all parts of room and opening can be utilized as a tea kettle attachment in addition to griddle hole top.

FIRE CONTROLLED TO A DEGREE Circular Draft Regulators on Feed and Ash Pit Doors are valve scated, fitted until absolucity air tight and Warranted to remain so. They are mounted on heavy, quick acting screws, working in a detachable yoke, and when opening screw in, not out, preventing breakage in use.
